

6/29/2020 Update:

The third phase of the project will start the week of June 29th and will involve the slip lining sections of the sewer system under this project. This work will be conducted by Visu-Sewer Inc. It is anticipated the contractor will start along Jordan Drive and work their way east.

Residences will be notified with door hangers before slip lining starts on the sewer serving their property. Residents will be asked to limit the amount of wastewater they discharge during the 4-6 hours when the sewer is being slip lined. This phase should be completed in about 5 weeks.
